

GAURAV KUMAR

Data Analyst

+91-7983372806 gk5716378@gmail.com [github](https://github.com) linkedin.com/in/gauravkumar158/

Summary

Data Analyst with strong experience in Excel, Python, and problem-solving. Skilled in data cleaning, transformation, and visualization using tools like Numpy, Pandas, and Matplotlib to support data-driven decision-making. Interested in collaborating on meaningful analytical work in fast-paced environments.

Skills

Technical: Python, Numpy, Pandas, Pytorch, Machine Learning, Deep Learning, SQL, C++, Data Structures and Algorithms
Data Visualization: Matplotlib, Seaborn, Power BI, Tableau
Tools & Technologies: Excel (Advanced), Power Query, DAX
Analytical Abilities: Data Cleaning, EDA, AI & Automation, Attention to Detail, Reliability, Marketing, Critical Thinking

Experience

1. **Full Stack Web Development Intern (MERN Stack)**

Twowaits Technologies (Remote)

— Developed and deployed 3 responsive web apps using MERN stack, improving load speed by 30%.

2. **Data Visualization Virtual Experience Program | TATA (Forage)**

December 2025

— Evaluated business datasets and created 5 Power BI visualizations to handle datasets of 1,000+ rows inputs and deliver actionable insights for data-driven decision-making.
- ### Projects
- Smartphone Sales Analysis Dashboard | SQL, Power BI

Analyzed 20,000+ sales records using NumPy and Pandas to clean, transform, and prepare data for analysis.

Built an interactive **Power BI dashboard** tracking KPIs like **Total Sales (769M), Quantity (19K), and Transactions (4K)**.

Created visualizations for **monthly trends, city-wise sales, and top-performing models** (e.g., iPhone SE, OnePlus Nord).

Applied slicers for **brand, month, and payment methods**, enabling detailed drill-down and comparison.

Data Analysis of Nutritional Dataset | Python

Processed and **Handled 2,000+ food items with 20 nutritional features** using **Numpy and Pandas**.

Identified calorie distribution ranging from **~50 to 1800+ calories**, with majority items between **200–500 calories**.

Built visualizations using **Matplotlib and Seaborn**, including histograms and boxplots to analyze nutrient spread and outliers.

Generated correlation heatmap showing strong positive correlation (**~0.7–0.9**) between **total fat and calories**.

Awards & Certifications

Data Analytics Intern: Completed 5 practical case studies involving SQL, data cleaning, dashboards, and presentations.

Data Analytics in Excel (Advanced): Performed advanced data analysis using Excel functions, Pivot Tables, and Power Query on datasets with 10,000+ rows to derive meaningful insights.

Python with ML: Built 3+ ML models using Python to analyze and predict data trends.

SQL Certificate: Wrote and optimized 50+ SQL queries involving joins, aggregations, and subqueries to extract insights from relational databases.

Education

B.Tech Information Technology Gautam Buddha University, Greater Noida	Graduated: 2023 CGPA: 7.82 / 10
12th (Archana Memorial College) May /2018	77%
10th (Archana Memorial College) May /2016	82%
